

WHIRL

WHIRL is a secure, clinician-friendly, user-customizable rounding list application that utilizes relevant patient data from Epic to automatically generate and print rounding lists. Paper remains the most efficient way to quickly reference information and jot down notes. WHIRL™ reduces the data from Epic into a handy, printed rounding aid.

Data suggests that using WHIRL decreases chart review time, improves provider satisfaction, and improves accuracy of information. Time saved by WHIRL can be repurposed to education, communication between health care providers, and direct patient care.

Import options, columns, and/or mappings from an existing WHIRL list

Source WHIRL List

- Options
- Columns
- Meds
- Labs
- Procedures
- Studies
- Flowsheet rows
- Units
- Rooms

WHIRL™ compresses patient data onto an 8 x 11 printed page into an efficient clinical overview. WHIRL lists may be created & shared with colleagues as desired. For each patient, users can see handoff summary/plan, vitals, diet, code status, I/Os, lines/drains/airway, labs, meds, imaging, procedures, etc.

The WHIRL App allows users to:

- ❑ Share custom WHIRL lists with colleagues (if desired)
- ❑ Alter which patient data elements, lab fishbones, and handoff services appear on the printed list
- ❑ Customize various data elements from the following categories: Meds, Labs, Procedures, Studies, Flowsheet Rows, Units, & Rooms
- ❑ Combine or append Epic lists to custom WHIRL lists
- ❑ Import WHIRL list settings from existing lists or restore altered settings to their default state
- ❑ Add text or images to printed rounding lists

Other IllumiCare Apps Include:

Trials nudges providers at point of care when their patient matches the referral criteria set by the study coordinator. No complex EMR / BPA programming required!

With **Gaps**, Ambulatory providers see open care and coding gaps in your ACO/MSSP population.

Benchmarking empowers each provider to compare their spending per admission with other providers in the same specialty.

PDMP provides a link to your state's PDMP database. It automatically transcribes patient demographic information within the app to quickly display your patient's PDMP report & opioid exposures.

RxOffers electronically sends prescription discount offers to patients. These offers may include copay assistance programs for branded medications, as well as cash pay offers for branded and generic medications.

RxLightning is a streamlined approach to prescribing, ordering, and tracking specialty medication and the enrollment process within the Electronic Health Record (EHR) workflow.

UpToDate app keeps clinicians logged into their account to seamlessly track accrued CME's. The knowledge contained in UpToDate is evidence based and continuously updated.

Resources is a repository that contains informational content (clinical resources and patient education) relevant to the patient being viewed in the EMR or content that has been previously saved by the user.
