AutoHR360

Gaps

Blue Cross and Blue Shield of Alabama AutoHR360 & Gaps

Gaps

In 2022, the Smart Ribbon was introduced to 30 Alabama practices. Other primary care practices in Alabama saw the successes of those practices and quickly signed up to have the Smart Ribbon implemented in their practice. The Smart Ribbon is now in over 240 practices statewide.

Gaps

Medication Adherence

Medication	PDC	Last Fill Date	Adherence Alert
Diabetes	92%	10/15/2024	Patient currently adherent - reinforce behavior.
IRAS	85%	10/15/2024	Do not stop. Monitor for side effects.
Statin	85%	10/15/2024	Do not stop. Monitor for side effects.

- Automatically starts up with your EMR
- Maintains user and patient context with the EMR
- If the patient currently being viewed in the EMR is a Blue Cross and Blue Shield of Alabama member (Blue Advantage® or commercial), the Gaps app will visually indicate whether gaps exist
- Surfaces gaps in care, risk capture, recent care, etc.
- Dispute or Resolve diagnosis within the app
- Clicking on the badge reveals the patient health snapshot info
- See all attributed members in a list view, with filters, and have the ability to print a summary list for easy reference
- Ability to dispute conditions from the previous year
- Annual Wellness Visit & AutoHR360 Tracking

AutoHR360

The Smart Ribbon and AutoHR360 app detects patient context from your EHR and pre-fills the form with the latest patient information from BCBSAL. The electronic form can be updated, saved and electronically submitted without having to print a paper form, scan it in and upload it.

Benefits:

- EMR-agnostic; no integration involved
- Maintains user and patient context with the EMR
- Presents an electronic HR360 form that is pre-filled based on claims data making it easy to complete and submit with no more printing, scanning, or uploading of forms
- All functionality available in ProviderAccess
- Annual Wellness Visit & AutoHR360 Tracking

Pre-filled for your convenience (Pt info, Hx, Dx, Rx, etc.)

THE SMART RIBBON® The IllumiCare Smart Ribbon is an EMR-agnostic, unobtrusive way of presenting data in provider workflow. Requiring no separate user login or patient lookup, the Ribbon “nudges” providers with actionable data without disrupting their clinical workflow.
